| County          | Pasco   |
| Road            | US 19   |
| Design Cost     | \$268,000   |

About

This project consists of urban corridor improvements to enhance safety for all road users.

Improvements include the installation of raised medians/traffic separators at select locations, the addition of two mid-block crosswalks (at San Marco Drive/ Johnson Road and between Elizabeth Avenue and Edna Avenue) with midblock pedestrian signals (MPS), refuge islands, curb ramp upgrades and sidewalk connections, as well as milling and resurfacing work as needed to replace pavement markings.

There will be signal work at the mid-block crossings and minor drainage work where required.
