### About

***As of September 10, 2021, all construction activities associated with this project are complete.***

This project will replace and repair the Booker Creek concrete box culvert under 10th Avenue South, 5th Street South and 11th Avenue South in St. Petersburg.

This project is part of the FDOT's Off System Bridge Replacement Program.

The area along 10th Avenue South will require the removal and replacement of approximately 20 feet of the culvert. This will result in a full road closure of 10th Avenue South. A detour will be used to guide through traffic around the work zone. Access to properties along 10th Avenue South will be maintained during construction.

During construction portions of the sidewalk and roadway will be removed. They will be restored before the project completion. The roadway brick, granite curb, and sidewalk hex block pavers will be reset as part of the restoration activities.
