

I-4 ITS Installation for Wrong-way Detection at SR 33/CR 582 in Polk County 254677-4-06-92

Project Details	
Work Type	ITS Installation for Wrong-way Detection
Phase	Construction
Limits	I-4 off-ramps at SR 33/CR 582
Project Start	June 2018
City	Lakeland
Road	CR 582 I-4 SR 33
Construction Cost	\$372,108
Estimated Completion	Fall of 2019
Contractor	Ajax Paving Industries of Florida

About

The Florida Department of Transportation's Design-Build Firm, Ajax Paving Industries of Florida, is installing Intelligent Transportation System (ITS) fiber for wrong-way detection at I-4 off-ramps at SR 33/CR 582 in Polk County.

In recent years, the Department has been installing these sites throughout the District as a safety measure to help prevent wrong-way events. These sites consist of a static sign and red flashing beacons that turn on when a motorist travels in the opposite direction of traffic with an automated alert to the FDOT District 7 SunGuide Center with the actuation of a wrong-way event.

Nightly lane closures may occur from 11 p.m. to 5 a.m.

This project is expected to finish in the fall of 2019.
