New Traffic Pattern Coming to SR 60 and US 301

Brandon, FL - As part of the current FDOT widening project on SR 60 at US 301 in Brandon, Pepper Contracting Services will be shifting traffic at the intersection and eliminating some of the turn lanes beginning Monday night Oct. 23rd, 2017. This traffic shift is expected to take several nights to complete.

One of the two left turn lanes on SR 60 in both the east and west bound directions will be closed. The right turn lanes from SR 60 onto US 301 will also be changed to through lanes. These temporary changes are necessary so the contractor can use the median area for utility work. It is anticipated this traffic configuration will be in place until the spring of 2018.
