Length	2.76 total miles
City	Hernando Inverness
County	Citrus
Construction Cost	\$1.3 million
Estimated Completion	Late 2024
Contractor	Ajax Paving Industries of Florida

About

This design-build project will repair and repave several areas of the Withlacoochee State Trail in or near the city of Inverness and the Hernando area in Citrus County. Design began in May 2024 and construction is expected to begin in July 2024.

The project will rehabilitate a total of 2.76 miles comprised of several trail sections that are in poor condition from approximately mile marker (MM) 27.00 to MM 28.58, MM 28.59 to MM 28.95, MM 30.03 to MM 30.40; and MM 35.81 to MM 36.15. The construction will also include providing mid-block crossings (including high emphasis crosswalks) at E Lake Lane near MM 35.94, and at E Line Drive near MM 36.09.

The construction will take place in segments (described below), with one segment area of the trail closed at a time. Each segment area will be closed around-the-clock for up to several weeks, beginning with the Segment 1 closing on approximately Tuesday, July 16, 2024. We'll update this page with approximate starting and ending dates during each segment of construction.

The Withlacoochee State Trail is an existing 46-mile-long paved shared use path built on a converted railroad corridor that connects Pasco, Hernando, and Citrus counties. The trail begins at the Owensboro Junction Trailhead in Dade City and terminates at the Gulf Junction Trailhead in Citrus Springs. Approximately 29 miles of the trail is in Citrus County.
