About

The Florida Department of Transportation's Design-Build firm, Cone & Graham, Inc., is installing a new pedestrian mid-block crosswalk at US 19 and Charlene Lane in Pasco County.

Other safety and operational improvements include roadway resurfacing, highway lighting, and median and sidewalk modifications.

What is design-build? Design-build is a method of project delivery in which one entity - the design-build team - works under a single contract with the FDOT (or any owner) to fully design and construct a project. **The contract work covers from initial design through construction completion.** This contract type typically allows for faster construction of a project as design and construction can be on-going simultaneously.
