About

This project is adding landscaping along the I-275 corridor at select locations outside of the roadway, at interchanges, and near Robles Park in Tampa.

The landscape design will use a diverse mix of site-appropriate, Florida-friendly plant species to increase the tree canopy and complement the roadway aesthetics while prioritizing public safety.

What to Expect During Construction:

- To construct the project, landscaping machinery, utility trucks, and trailers will be used and may produce noise during daytime hours.
- Residents and motorists may encounter reduced speed limits, flagmen and signage guiding traffic around active equipment, and temporary sidewalk or pedestrian path closures.

Project completion is expected to finish during early 2027.

****

Under Florida Department of Transportation (FDOT) standards and governing rule Fla. Admin. Code R. 14-40.003 , parking vehicles or heavy equipment within designated landscape projects or state-owned rights-of-way is strictly prohibited.
