About

This project will change the existing six lane divided highway to a six lane controlled access roadway with one-way frontage roads in both directions parallel to US 19 between SR 580 and CR 95.

An Interchange is planned midway between SR 580 and SR 586 (Curlew Road), just north of Boy Scout Rd. This interchange will accommodate U-turn movements between northbound and southbound frontage roads and serve as a pedestrian crossing. In addition to the interchange, pedestrians will have a dedicated underpass between Evans Rd. and Republic Dr.

A new interchange at SR 586 (Curlew Road) will also be added so that US 19 traffic will travel uninterrupted as it passes over SR 586. New ramps will provide access to new frontage roads and SR 586.

A new pedestrian bridge over US 19 is planned at Northside Dr. Right of way will be acquired for storm water ponds.

The project is currently in design. Construction is anticipated to begin in late 2022.

Project 256774-2 has been combined with this one for a single construction project. All updates will be posted on this page.
