About

All construction activities associated with this project were completed on Friday, August 16, 2024.

This design-build project upgraded 402 traffic signals and installing 98 miles of new fiber conduit and other communication components to enhance the connectivity throughout the City of Tampa.

This contract combined work from projects 424213-3,424213-4 and 424213-6 into a single construction contract.
