

Heights Mobility Study 440511-1-22-01

Project Details

Work Type	Corridor/Subarea Study
Phase	Completed
Limits	Scott Street to Waters Avenue
City	Tampa
County	Hillsborough
Road	Florida Avenue (Hillsborough) Tampa Street US 41 Business

About

The Heights Mobility Study is an effort to improve safety and mobility within the Greater Seminole/Tampa Heights neighborhoods, primarily along the Florida Avenue and Tampa Street/Highland Avenue corridor between downtown Tampa and the Hillsborough River. Additionally, the Study team is working with the community to develop a longer-term transportation vision for the neighborhoods.

The Study is based on engaging the communities along the corridor in order to achieve the following objectives:

Identify opportunities for actionable short-term safety and mobility improvements

Develop a clear understanding of existing and future community character and develop mobility strategies to support the community needs.

Build consensus around a Mission, Vision, and Goals for the Florida Avenue and Tampa Street/Highland Avenue corridor moving forward.

Dependent on the community's vision, future Study phases may include engineering design, and ultimately a project for construction.
