

I-4 ITS Installation for Wrong-Way Detection at SR 33/CR 582 in Polk County 254677-4-06-92

Project Details	
<b>Work Type</b>	ITS Installation for Wrong-way Detection
<b>Phase</b>	Completed
<b>Limits</b>	I-4 off-ramps at SR 33/CR 582
<b>Project Start</b>	June 2018
<b>City</b>	Lakeland
<b>Road</b>	I-4
<b>Construction Cost</b>	\$372,108
<b>Estimated Completion</b>	Fall of 2019
<b>Contractor</b>	Ajax Paving Industries of Florida

**About**

**PARTIAL ACCEPTED: ON NOVEMBER 2, 2019**

The Florida Department of Transportation's Design-Build Firm, Ajax Paving Industries of Florida, is installing Intelligent Transportation System (ITS) fiber for wrong-way detection at I-4 off-ramps at SR 33/CR 582 in Polk County.

In recent years, the Department has been installing these sites throughout the District as a safety measure to help prevent wrong-way events.

These sites consist of a static sign and red flashing beacons that turn on when a motorist travels in the opposite direction of traffic which then sends an automated alert to the FDOT District 7 SunGuide Center communicating the actuation of a wrong-way event.

This project is expected to finish in the fall of 2019.
