

University Area Multimodal Feasibility Study 411461-1-12-08

Project Details	
<b>Work Type</b>	Multimodal Feasibility Study
<b>Phase</b>	Study
<b>Limits</b>	From I-275 to I-75
<b>Length</b>	6.2 miles
<b>City</b>	Tampa Temple Terrace
<b>County</b>	Hillsborough
<b>Road</b>	Fowler Ave

Contact Information	
<b>Study Manager</b>	Brian Hunter 813-975-6436 Brian.hunter@dot.state.fl.us
<b>Media Contact</b>	Kristen Carson 813-975-6202 Kristen.Carson@dot.state.fl.us

**About**

The University Area Multimodal Feasibility Study will evaluate potential corridor improvements along SR 582 (Fowler Avenue) between I-275 and I-75.

The corridor is being studied to determine what improvements can be made to bicycle/pedestrian and potential transit facilities that will provide better circulation and overall safety to the corridor.

The purpose of the study is to develop and evaluate improvement alternatives such as a potential transit envelope and circulation enhancements that will better facilitate access to/from I-275 and I-75, major employment and activity centers, and a future regional intermodal center in the study area.

The study will also identify short and long term improvements to enhance multi-modal safety along the corridor, which could include improvements to enhance safety at signalized intersections, new pedestrian crosswalks, and lighting improvements.

The study is anticipated to be complete in late 2019.
