The $96.7 million capacity improvement project added one lane in each direction to I-275 from north of I-4 to north of Hillsborough Avenue (US 92) using the existing right-of-way.

Other improvements: constructed noise barrier walls along the corridor, installed fencing and Intelligent Transportation System (ITS) devices, and reconstructed the overpasses between Floribraska Avenue and Hillsborough Avenue.

**Construction cost included original construction contract amount plus approved contract changes. It did not include inspection oversight.*
