About

This project will mill and resurface the roadway to extend the pavement's service life, install new signals, make minor drainage improvements, and add complete street safety improvements to the corridor.

The complete street improvements include relocating the curb line on the east side of Tampa Street to provide a wide sidewalk, improve pedestrian visibility, and reduce crossing widths.

Improvements also include reconstruction of substandard curb ramps, replacing damaged sidewalk, and widening the sidewalk on the east side of Tampa Street.

In addition, bulb-outs will be constructed at the southwest corner of Florida Avenue at Euclid Avenue, and new pedestrian crossings will be installed at 26th Avenue on Florida Avenue, and at Woodlawn Avenue and Indiana Avenue on Tampa Street.

The project also supports planned projects by HART, including a Bus Rapid Transit system.

This project is being designed in conjunction with **FPID 440511-8-52-01**. For more information on that project, please **click here**.

Construction is currently anticipated to begin in early 2027.
