

I-4 Truck Parking Facility 448698-1-52-01

Project Details	
Work Type	Truck Parking Facility
Phase	Construction
Project Start	Construction starts Summer 2025
City	Plant City
County	Hillsborough
Road	County Line Rd I-4
Construction Cost	\$29.4 million
Estimated Completion	Late 2026
Contractor	Ajax Paving Industries of Florida, LLC

About

This design-build project is constructing the new I-4 Truck Parking Facility and making roadway and pedestrian improvements to I-4 and County Line Road in Hillsborough County.

The new I-4 Truck Parking Facility will be built on a 49-acre FDOT-owned site and provide 160 truck parking spaces.

The new facility will be incorporated into Florida’s Truck Parking Availability System (TPAS) to provide drivers with real-time available parking information via mobile application and dynamic roadside signs.

The project includes other infrastructure improvements for trucks accessing the I-4 Truck Parking Facility, traffic entering and exiting eastbound and westbound I-4 ramps, and County Line Road.

Improvements include:

- Replacing the traffic signal and providing dual right and left turn lanes from the eastbound I-4 exit ramp onto County Line Road.
- Adding a traffic signal and providing dual right and left turn lanes from the westbound I-4 exit ramp onto County Line Road.
- Reducing the radii and adding truck aprons to accommodate trucks.
- Modifying traffic signals and reconfiguring travel lanes along County Line Road to reduce truck delays and improve mobility.
- Installing new signing and pavement markings, highway lighting, and ITS systems.
