About

The purpose of this Resurfacing, Restoration and Rehabilitation (RRR) project is to preserve and extend the life of the existing pavement through milling and resurfacing. This project also includes minor drainage work, roadway, and pedestrian safety improvements.

As a part of this project, FDOT is proposing to install a permanent directional median opening on US 301 at Cowley Road to reduce conflicts and improve safety conditions.

Construction is currently anticipated to begin in Fall 2024.
